

# New Care Home Opening in Sandridge

Purpose built to cater for residents' specific needs, Tara's Retreat opens in Summer 2006. The home is situated in the High Street of the beautiful rural Hertfordshire village of Sandridge, close to the historic city of St Albans and just 40 minutes from London.

Tara's Retreat will be designed, decorated and equipped to the most desirable standards of accommodation and in conjunction with the facilities, will ensure that residents enjoy a superior quality of life. This style is a result of award winning designs used on similar B&M Care Homes. At B&M Care we pride ourselves on providing the very latest facilities and the highest standards in personalised care.

This 39 bed residential care home, set in beautifully landscaped grounds, will be

dedicated to providing residential care for the elderly and for those with dementia related illness.

All rooms are en-suite and decorated to the very highest specification. There will also be a choice of elegant lounges and dining rooms for residents and their guests.

Facilities at Tara's Retreat include: resident call bell system for assistance at any time - single en-suite rooms - assisted bathrooms for residents with physical disabilities - TV and telephone points in all bedrooms - disabled and wheelchair access throughout, including lift - refreshment making facilities for residents and their guests - in-house laundry - hairdressing salon - full activities calendar and daily programme - local GPs, district nurses, dentists, opticians and chiropodist visits -

person centred holistic support - Keyworker system.

B&M Care take a passionate interest in ensuring that we maintain our reputation of providing high standards of care for every single resident and that we continually seek to improve our services.

Whilst residents are encouraged to be as independent as possible there are, of course, occasions where a higher level of care is required. To this end, certain B&M homes offer specialist care for residents with particular physical or dementia related needs.
