We can help

For patients

For the care setting

“A recent report suggests that dental health care should continue to be delivered by a patient’s own dentist. We know that this may not always be possible.”

Dental Care @Home is a full service domiciliary-based dental health care service that can solve this problem.

As more of us are keeping our teeth for longer, and as our living situation changes, the need to continue looking after our teeth has become more important than ever.

Enjoy comfortable dentures that allow you to talk with your friends and family on a day-to-day basis.

Benefit from a healthy smile that brings warmth and confidence to yourself and others, ideal when capturing family moments.

Healthy teeth are also functional teeth, which support eating and nutrition

How we help.

- Fully managed biannual examination & treatment visits.
- Continuous yearly support.
- Denture labeling to assist care teams.
- Oral health advice and training for support teams enhances the dental well being of clients.
- Added value for your care setting. Promote routine dental services as part of your package at no extra cost.
- Professional team dedicated to the welfare of your clients. Deal directly with a team delivering NHS dentistry every day on the NHS.
- Transparent NHS fees (unless exempt).

For care teams

Dental Care @Home is managed
and operated exclusively by
Woodside Dental Practice

Add value to your care setting.

Few if any patients receive a dental health check as their care needs change. As more of us are retaining our teeth for longer, this places additional and alternative responsibilities on your care setting.

This is where Dental Care @Home offers a solution.

Step above your competition.

We offer a fully managed dental health care service. This means we take care of proactively managing dental visits throughout the year so that your clients have access to dental health assessments, regardless of when their care needs change.

Our team will diagnose and carry out treatments using the latest in mobile dental technology, significantly expanding the scope of treatments and the level of care that can be provided in your care setting.

Provide your teams with access to oral health advice for your clients to enhance their day-to-day well being.

What to do next.

Dental care @Home is a service provided exclusively by Woodside Dental Practice.

Please call our Domicillary Coordinator on 0141 3320793, email us on enquiries@dentalcareathome.co.uk or visit our website, www.dentalcareathome.co.uk
