

Because nobody wants to go into a care home

alcove Award winning care technology

Alcove. Pioneering Independent Living.

**Alcove is an award winning, easy to use service which helps older adults to stay in touch with family, friends and anyone who cares for them and makes sure that they are safe and well at home.**

#### THE ALCOVE SAFE AT HOME PACKAGE

Securely see what is happening at home during the day and at night. Get alerted when something might be wrong without any need to call for help (e.g. not opening the fridge for 24 hours, missing your medication, not coming out of the bathroom etc.).

Alcove raises an alert even if your loved ones can't call for help, so they will never be left and someone will be there quickly. It also gives off Wifi Internet. Family members with permission can have access to see what is happening at home, giving them peace of mind that their loved ones are ok and getting the right support.

“It gives us as a family peace of mind - we can pinpoint her location in the house, see that she is eating, and most importantly know that she is at home when she should be. Our biggest concern as a family is that she doesn't wander off and get lost - we like to see that she is in the house at night and this helps us to relax without actually disturbing her. Being alerted to any falls because of lack of movement is also so important as if she did have a fall, she might not be able to get to the phone to get help. It can also show if she is using the bathroom a lot and highlight any health issues.”

Alcove has been designed with carers and care professionals to help keep people safe and well in their own home.

We work with local councils, housing associations, social care agencies and elderly and vulnerable people to create a system that keeps older and disabled adults safe and sound in their own home.
