# PROFESSIONAL HOME ORGANISER

---

## Decluttering & Organising your Home

- Feeling overwhelmed when you try to declutter and organise your home, you don't know where to start? I work with you to sensitively declutter and organise your household spaces. I even offer styling advice so your spaces aren't just efficient; they look fabulous too.

## Streamline Your Office

- Poor systems and disorganised work spaces cost business owners time and money. An unruly work environment affects morale and productivity. Inefficiencies not only increase costs, they take you away from family and friends.

## Moving House or Downsizing

- Relocating and still having to juggle work, family and everyday life? Don't Panic! I will manage the entire move plus ensure that your new home is set up to run efficiently.
- Book a *Free* consultation - either online or in your home
- A free charity shop drop off
- Organising Toolkit – my toolkit is packed with all the essentials, so no need to worry about finding bin bags, labels, stickers, filing dividers etc...
- Home organising advice
