

Reminders & Check-ins

To help vulnerable individuals remain independent

Over 1.5 Million reminders and check-ins delivered

CareCalls contacts you by phone throughout the day and reminds you to perform important tasks and/or checks that you are ok. Optionally, if there is no response after two attempts, we can contact members of your support network e.g family members or a neighbour. CareCalls helps you remain independent and manage well-being as well as bringing peace of mind to those supporting you.

Bob's mum Jane kept forgetting to take medication, they were both worried

CareCalls now calls Jane each day reminding her to take her medication and check she is ok

If Jane doesn't respond to a call, Bob is sent an alert

So now everyone feels peace of mind knowing that CareCalls is there to help Jane

Uses include...

Prompting medication, hydration or personal care

Prompting one-off commitments e.g doctors appointments

Home safety

Supporting carers

Users include those managing...
