

# Help! I do not want to go into a care home

“ It is quite clear I am no longer safe on my own in the house. I can't even make a cup of tea or take my medication safely. I struggle to get to the toilet in time. I prefer not to move as I fall with every attempt to get anywhere. It's now too much effort to change my clothes or have a good wash. ”

care services

supporting your independence

Live in care is simply for anyone who wishes to remain and be cared for in the familiar surroundings of their own home. With Ness M you are able to embrace your personal care needs, housekeeping and companionship into one single cost with our Live in care service. You may benefit from this service if you are:

- Individuals and families whose **hospital discharge** is reliant on having the appropriate level of care and support in place.
- Those currently being cared for throughout the day and night by various carers but would like to reduce their costs with a one-to-one dedicated live-in carer.
- **Couples** who want to stay together regardless of their care needs. With one live-in carer often able to support both within the comfort of their own home, there can be significant cost savings in comparison to a care home.
- **Individuals prone to falls** who would benefit from a live-in carer to ensure their surroundings are safe to reduce their vulnerability. There is also the added comfort of having a carer to act immediately in the event of fall.
- **Existing care patients** who are unhappy with the level of care they currently receive. With all the benefits of being a direct employer we offer greater continuity, choice of carers and extensive geographical coverage

As a guide, our costs begin at £800 per week for individuals and £850 per week for couples, whilst respite short term care packages are available from £850 per week.
